

Dear Sir/Madam, It has been brought to my attention there is an effort to bad services provided by XM radio. In specific, traffic and weather. It is my opinion this service is a valuable asset to me. In my work i do a lot of travel and there are local stations that do not jprovide the service I desire or there is no coverage for long distances in remote areas. I am against any involvement by tradional radio stations to restrict any service provided by XM radio. Maybe if they had better service those of us that have XM radio would have still be using there service.

respectfully,

Arnold R. Sanders
